

Myoview 30 mL - (1.38 mg/vial ; Intravenous Injection)

Generic Name	Technetium TC-99M Tetrofosmin Kit	Innovator	GE Healthcare
Dosage	1.38 mg/vial ; Intravenous Injection	Branded US Sales	Less Than \$1000 mn
Probable FTF	Less Than 5	Known Para IV Filers	Less Than 5
Other ANDA developers	None	Tentative Approvals	None
Final Approvals	None	Generic Launches	None
Indication	MYOVIEW is a kit for the preparation of technetium Tc99m tetrofosmin for injection. Technetium Tc99m tetrofosmin injection is a radioactive diagnostic agent indicated for the following: * Myocardial perfusion imaging under rest and/or exercise or pharmacologic stress conditions to delineate regions of reversible myocardial ischemia or infarcted myocardium in patients with known or suspected coronary artery disease, * Assessment of left ventricular function (left ventricular ejection fraction and wall motion) in patients with known or suspected heart disease.		
Complexities	Yes
